Objectives

Detail-oriented Frontend Developer experienced in developing dynamic and accessible web applications. Looking to leverage strong technical and problem-solving skills to create impactful digital products.

Experience

07/2025 – 06/2026 Hyderabad, Telangana	Web Developer <i>Excellence College of Health & Safety Engineering</i> Developing secure web applications using React and Flask
01/2025 – 03/2025 Hyderabad, Telangana	Cyber Security Intern <i>ADVI Group of Companies</i> - Developed an Autonomous Network Attack Detection System using Python - Integrated Telegram Bot alerts, reducing incident response time by 30% - Performed log analysis and anomaly detection in res -time systems
03/2025 – 04/2025 Virtual, Remote	Cybersecurity Trainee <i>CodTech IT Solutions</i> - Participated in 3+ national-level hackathons and security challenges - Worked on real-time project modules including web vulnerability scanners - Gained hands-on experience in ethical hacking and penetration testing
05/2024 – 06/2024 Virtual, Remote	Cybersecurity Analyst Intern <i>Tata Group (Forage Virtual Internship)</i> - Completed a structured simulation involving cybersecurity investigations - Assessed vulnerabilities and recommended secure architecture practices - Worked with simulated internal tools and stakeholder communication
06/2025 – 06/2025 Virtual, Remote	Cybersecurity Consultant Intern <i>Deloitte (Forage Virtual Internship)</i> - Conducted risk assessments and developed client-facing cyber reports - Simulated threat modeling and third-party risk management - Gained industry level insights on enterprise cybersecurity protocols
07/2025 Virtual, Remote	Software Engineering Certificate Trainee <i>Saylor Academy</i> - Completed a 36-hour self-paced Software Engineering (CS302) course - Gained knowledge in SDLC, system architecture, debugging, and testing - Scored 75.81% and earned Certificate of Achievement (ID: 250671527SN) - Applied key concepts in real-world projects and personal development

Education

2021-2025 Kalaburagi, Karnataka	Bachelor of Engineering (B.E)-Computer Science Engineering <i>Khaja Bandanawaz College Of Engineering, Khaja Bandanawaz University</i>
------------------------------------	--

Skills

python	SQL
JavaScript	HTML
CSS	React Flask

Projects

Autonomous Network Attack Detection System with Telegram Bot

Tools: Python, Machine Learning, Telegram API

Built a real-time AI-based Intrusion detection system using cybersecurity datasets from Kaggle. Integrated with a custom Telegram bot in alert on malicious traffic patterns. Achieved 30% faster response time compared to manual monitoring.

OpenCV-Based License Plate Detection: Algorithms & Implementation

Tools: Python, OpenCV, OCR, Selenium

Designed an intelligent license plate recognition system with OCR and template matching. Integrated Selenium to auto-fetch vehicle details. Published in JSRT with 5.2 impact factor.

Student Enrolment System

Tools: HTML, CSS, JavaScript, Bootstrap, PHP, Laravel, MySQL, Stripe API

Built a secure, full featured enrolment portal with user login, course management, payment integration (Stripe), and an admin dashboard. Improved enrollment speed by 30%.

Web Application Vulnerability Scanner

Tools: Python, Requests, BeautifulSoup

Developed a scanner for identifying SQL Injection, XSS, and other OWASP vulnerabilities. Designed with modular architecture for extensibility and automation.

Advanced Encryption Tool (AES-256)

Tools: Python, PyCryptodome, JavaScript

Built a visually interactive encryption tool for AES-256 secured file encryption/decryption. Included animated frontend and GitHub-ready design with attribution.

learning Website using React.js

Tools: React.js, Vercel

Created an interactive, animated e-learning platform with clean UI and modular architecture.

Live at: syeda-educ- center.vercel.app

Certifications

Published Research License Plate Recognition using OpenCV

Published in: Journal of Scientific Research and Technology (JSRT) | Year: 2025

Published a paper detailing a smart surveillance system for real time number plate recognition using Python and OpenCV. Impact Factor: 5.2.

Software Engineering (CS302) Issued by: Saylor Academy | Year: 2025 Certificate ID: 250671527SN.

AWS Cloud Computing – Solutions Architecture Issued by: AWS via Forage | Year: 2025

Cybersecurity Virtual Internship Issued by: Deloitte (Forage) | Year: 2025

AWS Cloud Computing – Solutions Architecture Issued by: AWS via Forage | Year: 2025

Cybersecurity Analyst Program Issued by: Tata Group (Forage) | Year: 2025

Internship Project – Autonomous Network Attack Detection System

Issued by: ADVI Group of Companies | Year: 2025

Declaration

I hereby declare that all the information furnished above is true to the best of my knowledge and belief.
