

Syeda Ameena Najaf

Web Developer • Published Researcher

syedanajaf832@gmail.com | 09538090817 | Hyderabad, Telangana 500006 | linkedin.com/in/syedanajaf

OBJECTIVE

Detail-oriented Frontend Developer experienced in developing dynamic and accessible web applications. Looking to leverage strong technical and problem-solving skills to create impactful digital products.

EXPERIENCE

Web Developer — Excellence College of Health & Safety Engineering | 07/2025–06/2026

Developing secure web applications using React and Flask.

Cyber Security Intern — ADVI Group of Companies | 01/2025–03/2025

Developed an Autonomous Network Attack Detection System using Python; integrated Telegram Bot alerts, reducing incident response time by 30%; performed log analysis and anomaly detection in real-time systems.

Cybersecurity Trainee — CodTech IT Solutions | 03/2025–04/2025

Participated in 3+ national-level hackathons and security challenges; worked on web vulnerability scanner modules and ethical hacking/penetration testing.

Cybersecurity Analyst Intern — Tata Group (Forage) | 06/2025

Completed cybersecurity investigation simulation, vulnerability assessment and secure architecture recommendations.

Cybersecurity Consultant Intern — Deloitte (Forage) | 07/2025

Conducted risk assessments, threat modeling and third-party risk management simulations.

EDUCATION

Bachelor of Engineering (B.E) — Computer Science Engineering

Khaja Bandanawaz College of Engineering, Khaja Bandanawaz University | 2021–2025 | Kalaburagi, Karnataka

SKILLS

Python • JavaScript • HTML • CSS • SQL • React • Flask • Machine Learning • OpenCV • OCR • Bootstrap • PHP • Laravel • MySQL • Stripe API • Telegram API • Vercel

PROJECTS

Autonomous Network Attack Detection System with Telegram Bot — Python, ML, Telegram API. Real-time AI intrusion detection with Kaggle cybersecurity datasets and Telegram alerts; 30% faster response.

OpenCV-Based License Plate Detection — Python, OpenCV, OCR, Selenium. Number plate recognition with OCR/template matching; published in JSRT with 5.2 impact factor.

Student Enrolment System — HTML, CSS, JavaScript, Bootstrap, PHP, Laravel, MySQL, Stripe API. Secure enrolment, payments and admin dashboard; 30% faster enrollment.

Web Application Vulnerability Scanner — Python, Requests, BeautifulSoup. SQL Injection, XSS and OWASP-focused modular scanner.

Advanced Encryption Tool (AES-256) — Python, PyCryptodome, JavaScript. Interactive secure file encryption/decryption tool.

Learning Website using React.js — React.js, Vercel. Interactive animated e-learning platform.

CERTIFICATIONS & RESEARCH

Published Research: License Plate Recognition using OpenCV, Journal of Scientific Research and Technology (JSRT), 2025, Impact Factor 5.2.

Software Engineering (CS302): Saylor Academy, 2025, Certificate ID 250671527SN.

AWS Cloud Computing – Solutions Architecture: AWS via Forage, 2025.

Cybersecurity Virtual Internship: Deloitte (Forage), 2025.

Cybersecurity Analyst Program: Tata Group (Forage), 2025.

Internship Project: Autonomous Network Attack Detection System, ADVI Group, 2025.
